

Amendments to the Specification:

Please delete the paragraph beginning on page 5, line 3.

Please replace the paragraph beginning on page 1, line 14 with the following rewritten paragraph:

*C1*  
U. S. Serial No. \_\_\_\_\_, 09/574,950, filed \_\_\_\_\_,  
May 19, 2000, entitled "A Method For Providing Image Goods And/Or Services";  
Docket No. 80724P/F-P(03) to Dale F. McIntyre et al.

Please replace the paragraph beginning on page 4, line 19, with the following rewritten paragraph:

*C2*  
The present invention provides for a system and method of providing photographic products and/or photographic services to a consumer. With the system and method of the present invention, a consumer has the option of selecting a camera from among a selection of cameras, for example, a menu of cameras, and further to select a type of photographic service which the user wants associated with the selected camera to create a photographic product and/or photographic service plan. The photographic product and/or photographic service plan would be in the form of a subscription or contract, and would be set for a predetermined time, for example, one year, and at a predetermined fee, for example, a monthly fee. As an example, under the photographic product and/or photographic service plan, the consumer would use the selected camera for a year, and be offered the selected photographic services and/or photographic products for images captured by the camera, either for a monthly fee or a yearly fee. As a further option, after the expiration of the photographic service plan, the consumer can either keep the selected camera at no cost, purchase the camera at a reduced price, or exchange the camera for a new camera.

Please replace the paragraph beginning on page 5, line 11, with the following rewritten paragraph:

*C3*  
The present invention further relates to a method of providing photographic products and/or photographic services to a consumer which comprises the steps of selecting a camera and photographic products and/or photographic services which are to be associated with the camera for a predetermined time period, such that the photographic products and/or

photographic services are provided to images captured by the selected camera; and maintaining an account of the photographic products and/or photographic services as the photographic products and/or photographic services are provided to the consumer.

*C3*  
Please replace the paragraph beginning on page 5, line 19, with the following rewritten paragraph:

The present invention further relates to a method of providing photographic products and/or photographic services which comprises the steps of selecting a camera and photographic products and/or photographic services which are to be associated with the camera for a predetermined time period, such that the photographic products and/or photographic services are provided to film exposed by the selected camera; and maintaining a record of photographic products and/or photographic services as the photographic products and/or photographic services are provided to a user.

*C4*  
Please replace the paragraph beginning on page 5, line 26, with the following rewritten paragraph:

The present invention further relates to a system for providing photographic products and/or photographic services which comprises a photographic product and/or photographic service input station into which information with respect to a selected camera and a selected photographic product and/or photographic service plan which is to be associated with the selected camera for a predetermined period of time is input. The photographic product/service input station creates a user product and/or photographic service account for a user indicative of the selected camera and the selected photographic product and/or photographic service plan. The system further comprises a computer database unit operationally associated with the photographic product and/or photographic service input station that receives and stores the information with respect to the selected camera and the selected photographic product and/or photographic service plan. The computer database unit is adapted to update the user product and/or photographic service account as photographic products and/or photographic services in accordance with the selected photographic product and/or photographic service plan are requested and completed.

Please add the following new paragraphs on page 6 after line 8.

--The present invention further relates to a method of providing photographic products and/or photographic services to a plurality of different consumers, the method comprising the steps of:

each of the plurality of different consumers selecting product and/or photographic service plan, the plan including a camera and photographic products and/or photographic services which are to be associated with the camera for a predetermined time period, wherein the photographic products and/or photographic services are provided to images captured by the selected camera; and

maintaining for each of the plurality of different consumers an account of the photographic products and/or photographic services at a service provider, each of the accounts having an unique customer ID, the account being accessible from a single input station.--
